

Reserve Power

As the frontline defense in protecting mission-critical assets, customers trust Eagle Eye's gold-standard Reserve Power solutions for safety and compliance across the most rugged applications in the world.

Batteries

Eagle Eye's in-stock selection of flooded lead-acid batteries delivers trusted, long-life, critical backup battery power across a wide variety of industries.

Chargers

Offering the latest proven technology, switch mode chargers allows flexibility to scale, add redundancy, and hot swap for easy maintenance.

DC Power Systems

High-efficiency, flexible and modular DC power systems provide optimal configurability for telecom and network applications across wide temperature and voltage ranges.

Battery Racking

Designed for all types of stationary batteries – both standard and seismic applications – single, two, three & four-step, as well as multi-tier and custom configurations available.

Inverter Systems

Eagle Eye's series of modular, stand-alone and open frame inverter systems supports high-volume AC loads in telecom networks while offering optimal security.

Small Cell Systems

Flexible configurations for indoor and outdoor DAS and small cell 5G/4G/LTE applications, equipped with full features, including battery backup with dry contact alarms.

Spill Containment

Designed specifically for safety and compliance with standby power applications, the UL-recognized, flame retardant pillows are available in several sizes.

Battery Accessories

Eagle Eye provides accessories, including spill cleanup kits, battery cleaning agents and wipes, motive power accessories, insulated tools, signage, and more.
